

# IMAG E

The image that will help us is so that it can be done in augmented reality, we will do it with unity, since the image has several vectors and with it unity can work

## PRACTICE 01

This practice made data imprint that the computer already has stored by default, these values can be changed, if the user modifies the code.

## PRACTICE 02

What this program does is being an AI that will ask some information about us and then it will use it to interact with us like if we were talking with it
